What is Decision Manager Replay?

The **digital economy continues to evolve** and impacts nearly every business – requiring a relook at traditional fraud management processes.

Decision Manager Replay lets you confidently quantify fraud strategies in real time prior to activating in the live production environment.

You can now **quickly test** various 'what-if' rules profiles against your own historical data rather than wait months to understand the impact of any fraud changes.

KEY STATS

| IN NORTH AMERICA[1]		IN LATIN AMERICA[2]
79%	of merchants conduct manual review	82%
25%	of all orders are reviewed manually	28%
2.9%	orders are rejected	9%

# The Benefits of Decision Manager Replay

Avoid guesswork

**Quickly understand impact of rule changes**

Fine tune results

Test multiple fraud strategies

How Decision Manager Replay Works

Supports twelve months of transaction history for analysis

Tens of thousands of historical transactions can be tested under a new ruleset - in minutes. See the effect on Accept/Reject rates, chargeback rates, and manual review rates

Test and adjust previous transactions, reconfirming which are fraudulent and which are genuine
